BabyWear Diapers!

Directions and Product Information: Thank you for choosing cloth, the healthier alternative for your baby, your wallet, & our shared environment! Your diapers are clean & ready to use right out of the package, however, they will become more absorbent & softer the more they are washed. It will likely be 3-4 washes before they reach maximum absorbency!

Follow these washing instructions to get the most use out of your MamaBear Cloth Diapers:

It's not necessary to pre-rinse your diapers, if wet with urine simply put them in the diaper pail. If soiled with poo shake off solids into the toilet (you can "swish" it in the bowl for sticky solids, or use a diaper sprayer) then throw the soiled diaper in the pail.

Store in a dry pail until wash time—my family uses 5 gallon buckets, one in each bathroom. When full it's time to do a load of diapers! Just dump the bucket(s) into the washing machine, add detergent, & wash. You can sprinkle baking soda in the bottom of the pail to cut down on odors, or use a wet bag lining that you just toss in the wash with the diapers.

Laundry Rules:

NO: perfumes, added fabric softeners (like Drefit), laundry soap, *No fabric softeners!* No sheets, no liquid, none added to your detergent. Fabric softeners & laundry soap cause the diapers to become moisture repellent.

NO: Bleach! It eats fabric & will wear out your diapers fast. Instead try adding a little lemon juice to your wash (nature's bleach) or dry your diapers in the sun (nature's most powerful bleacher). To keep them soft toss them in the dryer for a few minutes before or after line drying.

YES: Believe it or not the best laundry detergents to use on cloth diapers are the cheapest! These typically have no additives, perfumes, or the like. My family uses SUN for our cloth diapers.

YES: Strip your diapers occasionally. I strip our diapers by adding OxyClean, Petzyme, Pure White Distilled vinegar, or baking soda to the wash. Each of these has different properties so rotating through a couple of them seems to work best. You don't have to do this every time as they are hard on fabrics. Instead just add these to your diaper wash cycle every 3 or 4 times.

YES: Every time you put your diapers away check to make sure there are no loose or damaged snaps or seams that might pose a hazard to your beautiful Baby Bear!
