Ring Sling!

Directions and Product Information: I've enclosed pictorial directions & some sample carries to help you get started using your MamaBear Ring Sling.

I recommend practicing with the sling **BEFORE** putting your baby in it! You might want to use a baby doll or the family pet first. Then, when you feel comfortable with it, make sure your baby is well-fed & rested when you put him/her in for the first time. Get baby settled & go for a walk right away. The movement of your body & the sling will probably put your baby right to sleep! Baby's love to be worn, so it shouldn't take long for your BabyBear to get comfy.

If you have any problems using your sling contact me, I'm happy to give over the phone advice or even come to you if you live nearby. You can also check out my videos on YouTube.com.

Please make sure you check the sling fabric & seams **each time you use it** to be sure that there is no damage that may cause the sling to fail. I only use real "SlingRings" which are made to hold 400 lbs of weight securely so any weakness will be from the fabric—if you notice rips or weak seams please **DO NOT** use your sling! Call me & I will be happy to fix it if I can! You can machine wash & dry your sling. Enjoy!
