**Directions and Product Information:** All wool items are **PRE-FELTED** as needed, & then **WASHED** and **LANOLIZED** upon completion so that when you get them they are ready for your BabyBear to wear right away.

Wool diaper covers have been around for hundreds of years, but are only now regaining in popularity as more people become concerned with the environmental and financial impacts of disposable diapering. Wool is a great, renewable, & healthy alternative to plastic or PUL diaper covers. Wool breathes keeping baby cool & dry & preventing diaper rash. When cared for properly (occasional lanolizing & gentle washing) it is a great moisture barrier as well since it is able to absorb up to 40% of its weight in water before feeling wet.

**CARE FOR YOUR WOOLEN:** Wool diaper covers do NOT need to be washed every time they are used. The natural properties of wool & lanolin prevent odors & bacterial growth. They only need to be washed every week or two or when they are soiled. Wash by hand in cool to warm water with a detergent made for wool (such as Woolite). Then, every second or third washing, or any time you notice that your product has become less waterproof you may relanolize: Fill a bowl with about 2 cups of **hot** water & add a dime-size amount of pure lanolin (such as Lansinoh or Purelan). Stir to dissolve then add 2 cups of **cold** water to cool before adding your woolen or use warm water and a lanolin wash such as Eucalan (follow directions on product). Soak the cover for 20 min in this mix to re-lanolize. Press out excess water (don't wring), & lay flat on a towel or sweater rack to dry.

If you have any questions or concerns or are unhappy with your cover for any reason please let me know right away as I am happy to help. Thank you for using MamaBear BabyWear products. Please feel free to check out my website at [www.mamabearbabywear.com](http://www.mamabearbabywear.com) for more great products and information!
